VICTORINOX

VICTORINOX - Multi Tools

High in the picturesque Swiss Alps, the fourth generation of the Elsener family continues the tradition of Multi Tools and quality cutlery started by Charles and Victoria Elsener in 1884. In 1891 they obtained the first contract to supply the Swiss Army with a sturdy «Soldier's Knife». Shortly afterwards, Charles Elsener developed the elegant «Officer's Knife». This revolutionary knife, design officially registered on June 12th 1897, became popular throughout the world because of its high quality, versatility and excellence in design.

The reference numbers in our catalog are listed in numerical sequence so that it is easy to find the item you are looking for. On the left side are the illustrations and on the right side at the same place the indications and the prices with the Bar-Code.

The number indicated besides or below the box symbol \boxtimes 10 refers to the standard contents of the packing unit. Please try to avoid ordering in smaller quantities. In most cases the standard contents are 10, 6 or 12 pieces, rarely 1 or 20 pieces.

The products of the categories 0-3 and 5-6 are manufactured in Ibach.

We GUARANTEE all VICTORINOX Knives and Pocket Tools to be of first class stainless-steel and also guarantee a life time against any defects in material and workmanship. Damages caused by misuse or abuse are not covered by this guarantee.

VICTORINOX is worldwide the leader in the categories 0-3

Multi Tools or Pocket Tools

We manufacture only some 10 different Pocket Knives with one or two blades, but more than 300 different Pocket Tools or Multi Tools with many features are listed in this catalog and available from stock.

The last figure of the 5-digit **Item number code** of Pocket Knives indicates:

- 1.36 00. = without ring, tweezers and toothpick
- 1. = with key ring

VICTORINOX

VICTORINOX - Domestic and Professional knives

To avoid the chromium-plating of carbon-steel knives, Charles Elsener, the oldest son of the founder urged a steel-mill to develop a stainless-steel that could be hardened. After many trials he manufactured in Ibach the first stainless-steel knives. As the results were not quite satisfactory at the beginning great efforts were made the following years to improve the quality of the stainless-steel knives. In 1931 the firm Brown Boveri in Baden/Switzerland was assigned the task of installing at VICTORINOX Ibach the world's first fully electric steel hardening plant. Afterwards the VICTORINOX professional and butcher knives become famous first in Switzerland, France and the USA and later worldwide.

The last figure of the 5-digit item number code indicates:

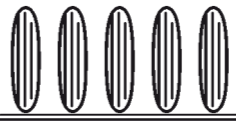

- 5.04 00 = polished rosewood handle
- 1 = red polypropylene handle, dishwasher-proof or red anti-slip, sterilizable FIBROX handle for professional knives
- 2 = blue polypropylene handle, dishwasher-proof or blue anti-slip, sterilizable FIBROX handle for professional knives
- 3 = black polypropylene handle, dishwasher-proof or black anti-slip, sterilizable FIBROX handle for professional knives
- 6 = other shape of handle
- 7 = white polypropylene handle, dishwasher-proof
- 8 = yellow anti-slip, sterilizable FIBROX handle for professional knives
- 9 = lacquered bubingawood handle

Where knives are available in several sizes, please note the length of blade which follows the 5-digit item number code, i.e. 5.18 00.15 or 5.20 33.22.

The illustrations on pages 22, 46–47b are shown at a scale of 1:3, and 1:4 on pages 23–29, 32–44.

On the illustrations and pricelists pages 22, 26–35 you will find the knives with wooden handles on the left and the corresponding ones with dishwasher-proof polypropylene and FIBROX handles respectively on the right.

The penultimate figure denotes:

- 5.41 00 = normal straight edge
- 10 = flexible blade 
- 20 = fluted edge 
- 30 = wavy edge 
- 40 = saw edge 
- 50 = 30 + 40 
- 60 = other shape of blade
- 70 = 00 + saw edge 

Packing

The paring knives, page 22, with rosewood and bubingawood handles are supplied in boxes of 6 pieces and those with polypropylene handles with patented blade protection in boxes of 20 pieces.

<p>NOTICE: These protective gloves are «cut resistant, not cut proof». These gloves are sold individually, not in pairs. These gloves are «ambidexterious» and can be worn on the left or right hand. In a typical application, only one glove would be worn (usually on the hand not holding the knife). Butchers, meat cutters and some food preparation workers will wear the «Performance Shield» or «Ultimate Shield» glove on the knife hand, and the «Knife Shield» on the hand opposite the knife.</p>			
		<p>Ultimate SHIELD Exceptionally high cut resistance. Durable, flexible and very comfortable. Made using a patented combination of stainless steel wire, encapsulated in a sheath of polyethylene and wrapped with a high performance polyester. Applications: Liner Glove, Knife Hand Glove in slaughterhouse, food preparation or food service.</p>
